ROOM LAYOUT (OPTIONAL)

Start your design

If you do not have your measurements you can use the grid paper to draw a rough outline of your room.

Measure your room

Measure your walls at two elevations; use the smallest measurement. Measure from the floor to the ceiling, the distance between walls, and mark the location of all electrical outlets, fixtures, ventilation, plumbing, gas connections, etc in the utilities box provided below, as well as on the grid paper provided.

Measure the door and windows, as well as the height and distance of each from the floor, ceiling, and wall edges. 42" are needed below windows and electrical wall outlets to install base cabinets and countertops with a backsplash. Mark all dimensions clearly on the planning grid and double-check all measurements.

Mark doors

Mark all doors in the room and indicate which way the doors swing.

Indicate windows

Place all the windows in the room along the walls.
